# ANNUAL REPORT

BY

F. W. BUNTING,

M.B.E., M.D., D.P.H.,

Medical Officer of Health for the  
Prescot Urban District,

FOR THE YEAR 1968

# PRESCOT URBAN DISTRICT COUNCIL.

---

The Chairman and Members of the  
Prescot Urban District Council.

Ladies and Gentlemen,

I have the honour to submit to you my Annual Report on the health of Prescot Urban District for the year ended 31st December, 1968.

I am happy to report that the health of the community has remained satisfactory during the year.

The death rate at 12.1 per thousand compares not unfavourably with that for England and Wales (11.9).

The birth rate of 15.6 per thousand shows a decrease compared with the previous year (17.9). It was lower than the rate for England and Wales (16.9).

There was a slight change in infant mortality, 6 deaths being recorded as against 7 in the previous year. All of these deaths occurred before the age of one month.

The incidence of infectious disease showed an increase compared with the previous year. There were more cases of measles, but fewer cases of whooping cough and scarlet fever. No cases of poliomyelitis were notified and there were no cases of diphtheria. Only 2 cases of tuberculosis were notified.

During the year continued attention was given to the problem of sub-standard property and in consequence 25 houses were demolished.

I should like to take this opportunity of expressing my appreciation for the assistance I have had from all members of the Council and in particular Mr. C. J. Hulme.

I am, Ladies and Gentlemen,

Your obedient Servant,

F. W. BUNTING
